MEDIA ALERT: LTS fulfills growing need for global near-shore and terrestrial build solutions.

San Diego, California – November 6, 2008 LTS today announced that it is expanding its product offering and geographic footprint to include custom turnkey near-shore and terrestrial build solutions to address the growing need in the global communications market.

“LTS has extensive international experience in the submarine fiber optic cable industry and offer expertise in all aspects of near-shore and terrestrial system design, permitting and construction,” said Iain Morris, Vice President and General Manager of LTS Infrastructure Services Group, “We are responding to an increasing need for turnkey solutions designed and managed to meet the individual and specific needs of system owners and suppliers.”

LTS will provide services including outside plant short and long haul design and construction; full turnkey design and construction of cable stations and prefabricated shelters; and project management services. For more information and a complete list of services, please visit www.LTScompany.com.

About LTS

LTS is part of the Leducor Group of Companies, a leading North American development, construction and maintenance conglomerate with over 60 years of industry experience, over 3,000 employees and offices throughout North America. LTS was established in September of 2003 and provides vertically integrated telecommunications services in all areas of design, build, testing & integration, installation, and maintenance of Fiber to the Premise (FTTP) networks and metro telecommunications networks.
