ABOUT US

North American telecommunications, utilities and industrial segments rely on LTS Infrastructure Services Group's extensive base of field staff and construction project managers, inspectors and permit agents to facilitate a seamless transition from project concept to completion. The group's wide-ranging professional skills include engineering, permitting, design, CADD, site development, network construction, project management, and inspection.

The LTS Infrastructure Services Group uses our range of knowledge, experience and specialization to complete projects of varied scales. Within our three core offerings we provide telecommunication services customized to the specific needs of each client.

- Outside Plant Services (OSP)
- Network Services
- Fiber to the Premise (FTTP)

ABOUT THE LTS GROUP

Through three complementary operations, the LTS Group of Companies offers a single-source solution that includes a full-service program, an extensive North American coverage area and expert technical staff ready to assist companies throughout the telecommunications, utilities and industrial communities. For more than 60 years, we have devised innovative solutions and engineered results for a variety of companies in both the private and public sectors, from remote rural operatives to Fortune 500 businesses.

Our group of companies is comprised of LTS Managed Technical Services Group (MTSG), LTS Infrastructure Services Group (ISG) and LTS Community Networks Group (CNG). Each company, or group, operates as an independent entity supported by a dedicated team of accomplished professionals. Together, or in combination as directed by the nature of the project, we provide a unique synergy which results in greater efficiencies for our clients.

LTS Managed Technical Services Group serves the telecommunications industry, providing field and central-office maintenance, electronic installation and construction management. Telecommunications, utilities and industrial segments rely on LTS Infrastructure Services Group's extensive base of field staff and construction project managers, inspectors and permit agents to facilitate a seamless transition from project concept to completion. LTS Community Networks Group specializes in system design and development of triple-play networks that deliver digital voice, high-speed Internet access and IPTV services to business and residential customers in small to mid-sized rural communities. The group also develops triple-play networks for property developers and for telecommunications operations.

OUTSIDE PLANT SERVICES (OSP)

Engineering and Design Our integrated engineering and design team determines and designs the optimal solution to suit your specific network requirements.

Project Management We manage all aspects of complex projects to control time lines and produce deliverables on budget with the quality assurance that comes with the LTS Group of Companies' brand.

Construction Services Our use of specialized equipment and technologies along with our own patented construction processes ensure projects are successful and meet your needs.

Industrial Leveraging our OSP expertise we are now offering services to the industrial sector where we provide engineering, permitting, and fiber optic network installation to the Oil, Gas and Mining Industries, as well as other private industrial organizations.

Procurement We leverage our established purchasing relationships and knowledge to ensure your OSP project will have the highest quality materials at the best price.

Relocates – Moves, Adds, Changes (MAC) We offer timely, on-demand relocation and change management services including engineering, project management and construction.

NETWORK SERVICES

Central Office and Head End Our technical experts use their advanced development and technology skills to build complex central and head end projects.

System Architecture By using leading edge design and engineering solutions, LTS Infrastructure Services Group (ISG) creates custom solutions for varied and challenging network issues.

FTTP SERVICES

Network Planning Our integrated design and engineering team draws knowledge from their wide-ranging experience, including pre-construction feasibility assessments to final hand over plans, to create solutions for your FTTP network.

Engineering and Design LTS Infrastructure Services Group's leading edge FTTP engineering and design team creates total network solutions that meet your objectives.

Vendor Assessment, Selection and Procurement By leveraging our strong vendor relationships to test and explore new technologies we can offer a range of solutions that fit unique technology environments.

Technology and Infrastructure Deployment LTS Infrastructure Services Groups deployment team ensures your project is delivered on time and on budget.

Systems Integration LTS Infrastructure Services Group can assist in the implementation and integration of proven, state-of-the-art technologies including legacy systems and applications to achieve your specific FTTP network objectives.
